

Dairy Supplies and Service Program

Partner Ag is committed to bringing service and value to your operation.

Our skilled route specialists have over 40 years of experience in the dairy industry and are ready to advise a solution to the needs of your operation.

We carry a wide range of products to meet all demands of cleaning and udder health on any dairy.

Along with delivering the proper supplies on a consistent schedule, we also offer unique services to prevent problems and keep your system performing at its optimum.

Milking Time Evaluation

The best time to evaluate the milking system is when it is running. Partner Ag offers a comprehensive milking time evaluation, this will provide you with recommendations for system settings and milking routines with the ultimate goal of lower somatic cell counts, improving udder health and cow comfort on your operation.

- Detailed logging of vacuum levels in milk line and milking unit to verify proper settings.
- Evaluation of detacher settings for proper milk out.
- Recording of milking routine for evaluation of udder preparation.
- Observations of any items that hinder better milking performance.
- A barn walk-through to check all areas related to cow comfort based on the **CowSIGNALS[®]** Diamond.
- Analysis of CIP on system, recording temperatures and chemical usage.
- After the evaluation a detailed report is produced showing all test data and items to be discussed for improvement.
- A follow up visit will be scheduled to review the report.

Our Shell & Liner Program

-  For your convenience, our route specialist will track when your liners are to be changed.
-  We carry a variety of liners to meet your individual farm needs.
-  We recommend changing rubber liners every 1200 milkings to ensure optimal comfort for your cows and optimal milk out for you.
-  As part of our commitment to ensure your milking system is performing at its best we change your liners at no extra cost.
-  Liner changes are included and we provide the stainless steel shells at no extra cost.
-  The shells are brought back to our facility and are thoroughly cleaned and inspected before being sent out again.
